

Introduction

This tape is integrated by special glass fiber cloth substrate with special aluminum foil by advanced composite technology, and then it is coated with special silica gel. It has high temperature resistance, impact resistance, combustion resistance and easy peeling without residue. It can protect the edges of the parts without burrs that don't need to be sprayed.

Applications

- It applies to any spray process, especially for HVOF
- Tip: Must be cut off by scissors

Standard Sizes & Packaging

Specification	985mmx33m
Length	fixed 33m
Thickness	fixed 0.28mm
Width	25mm; 50mm(MOQ: 5 rolls)

Other sizes (diameter and wire weight) can be manufactured accordingly to the requirements of customers.
