

Introduction

This product is used for special high-strength glass fiber cloth substrate and it is coated with special high-silicon rubber agent. It has excellent softness, conformability, impact resistance, flame resistance and easy-peeling without residue. It can protect the edges of the parts without burrs that don't need to be sprayed.

Applications

- We supply two kinds of glass fiber cloth masking tape, 0.26mm thickness is for arc spray and flame spray, and 0.30mm thickness is for plasma spray
- Tip: The usage of this masking tape is different. Tear the tape, and the torn part can still be split into two parts, and then using the inside part of the glass fiber cloth(not the yellow side) for masking

Standard Sizes & Packaging

Specification	985mmx33m
Length	fixed 33m
Thickness	0.26mm; 0.30mm
Width	25mm; 50mm(MOQ: 5 rolls)

Other sizes (diameter and wire weight) can be manufactured accordingly to the requirements of customers.
