

Introduction

Tungsten Carbide (P) is a cored wire that is specifically designed for arc spray systems. It produces a well bonded coating with high hardness that is abrasive.

Chemical & Physical Properties

W	C	Cr	Mo	Fe
30	2.5	3	0.75	Bal.

Applications

- Hard facing
- Wear resistance

Deposit Characteristics

Hardness	HRC 60-65
----------	-----------

Standard Dimensions

Wire	Diameter (mm)	Tolerance (mm)
	1.6, 2.0	+ 0 / - 0.05

Other sizes (diameter and wire weight) can be manufactured accordingly to the requirements of customers.

Packaging

Spool	15kgs(33 lbs) / spool (D270 spool)
